PROFESSIONAL SUMMARY

Aspiring Software Engineer with a strong foundation in Data Structures and Algorithms and Full-Stack Web Development. Passionate about building production-ready web applications with clean architecture, responsive interfaces, and scalable backend systems. Seeking a Software Engineering internship where I can contribute while continuing to grow as an engineer.

EDUCATION

Scaler School of Technology (Expected 2029)
Four-Year Academic Program in Computer Science

BITS Pilani (Expected 2029)
Parallel Degree Program in Computer Science

TECHNICAL SKILLS

Languages: Java (DSA), JavaScript (ES6+), Python, HTML/CSS

Frameworks: React.js, Node.js

Databases & Cloud: Firebase, Vercel

Tools: Git, GitHub

PROJECTS

SmartApply Resume Builder — React, Firebase, Vercel (Apr 2026)

- Built a responsive full-stack web application for resume creation and formatting.
- Implemented secure Firebase authentication and real-time data management.
- Designed a clean, responsive UI and deployed globally on Vercel.

Personal Finance Dashboard — React (Mar 2026)

- Developed a functional finance dashboard prototype during a hackathon.
- Architected state management for financial data visualization and insights.
- Optimized UI responsiveness under tight development timelines.

Interactive Game Development — Campfire Bengaluru Hackathon (Mar 2026)

- Collaborated in a 24-hour team hackathon to design and build a playable game.

LEADERSHIP

Hackathon Organizer & Volunteer

- Helped organize one of India's largest hackathons at Scaler School of Technology.
- Coordinated with industry partners including Meta, Hugging Face, PyTorch, and OpenENV.
